**DAIKIN** AIR INTELLIGENCE™

Always in control with the Daikin Comfort Control App

It can happen to anyone. You forgot to change the temperature of your heat pump system or air conditioner before leaving the house, or you will be delayed returning home and wish to avoid needlessly heating or cooling your home. What in the past would have resulted in wasted energy is no longer a problem. With the Daikin Comfort Control App and wireless interface adapter, you are always in control. You can use your tablet or smartphone to access your Daikin system via the internet. Fault conditions can also be detected remotely, allowing a quick response to problems.

### Daikin Comfort Control App Screen Shots

Control individual units or groups of units conveniently
Set a schedule matching your lifestyle

Select mode of operation and temperature setting

Select Fan mode only when cooling or heating is not necessary

Functions accessible via the Daikin Comfort Control App

Auto Mode Your Daikin system will change between cooling or heating to maintain the desired temperature range

Fan Mode The indoor unit fan will run to circulate the air in the space without cooling or heating

Heating Mode Your Daikin system will only run in heating mode to maintain the desired heating temperature

Cooling Mode Your Daikin system will only run in cooling mode to maintain the desired cooling temperature

Dry Mode Your Daikin system will continually work to dry the air without affecting the temperature in the space
Schedule Adjust or set a schedule remotely

Easy Installation

It is necessary to install a Wireless Interface Adapter on the indoor unit of the system. WPS (Wireless Protected Setup) functionality of the adapter allows for quick setup; once the app is launched and the user registers and logs in, the app will find all connected units within the network. See below list of approved units.

BRP072A43

.69" 3.11" 2.05"

App functionality requires that a **BRP072A43** wireless Interface Adapter be connected to an approved Daikin system.
